DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claims 6, 7, 10, and 15, are allowed. The prior art discloses a method for transmitting data through an IP network and determining congestion level within a network link and selectively choosing a link have least amount of congestion.

The prior art however fails to disclose or suggest setting a threshold level based on an expected performance from a "queuing model" of the network to reduce the congestion level of the link and selectively transforming the data at a proxy server coupled to a base station based upon the network conditions established.

Claims 16, 18, 20, are allowed. The prior art discloses a method for transmitting data through an IP network and determining congestion level within a network link and selectively choosing a link have least amount of congestion.

The prior art however fails to disclose or suggest selectively transforming the data at a proxy server coupled to a base station based upon the network conditions, and establishing a plurality of different threshold levels for determining when the data transformation is performed and/or not performed at the proxy server.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
